

This Form 1 and 2 geography book has been written and designed to impart knowledge, skills, perspectives, and values that will guide and motivate students and teachers to pursue sustainable livelihoods, to participate in a democratic society, and to live in a sustainable manner. The student's text book comprises eight chapters with background information and activities and work sheets linked to each topic. The chapters are solar energy, agriculture, water management, forest reserves, globalization, tourism, transport and communication, and trade and gender.

Moral Ethics and  
Environmental Studies
