

This Form 3 and 4 geography book has been written and designed to impart knowledge, skills, perspectives, and values that will guide and motivate students and teachers to pursue sustainable livelihoods, to participate in a democratic society, and to live in a sustainable manner. The student's text book comprises seven chapters with background information and activities and work sheets linked to each topic. The chapters are on the coastal zone, coral reefs, soil, climate change, the environment and conservation, settlements and population, and on minerals, oil and gas.
